Technical Skills:

Strong: Javascript / ES6+, Python, Node, React, React Native, Redux, D3.js, MySQL, AWS EC2 / S3 / RDS
Linux, Nginx, Apache, MySQL, HTML / CSS, Webpack, Mocha, Chai, Enzyme, Jest

Some Experience: PHP, Angular.js, Docker, Redis, Go, Elasticsearch, Kibana, Vue.js

Professional Experience:

Stage.GG | Lead Engineer

San Francisco, CA | August 2016 - Present

- Architected and built out a fully isomorphic Node + React + Redux + Webpack stack with server-side rendering on a dedicated frontend server
- Designed and constructed a dedicated Node + Restify API backend (including raw MySQL queries executed via Sequelize ORM) that serves the frontend, as well as third-party partners on public endpoints
- Created and maintained a build / release pipeline with AWS Elastic Beanstalk, Nginx, and Apache
- Grew traffic from launch to 100k uniques/mo on a single t2.micro AWS EC2 instance
- Developed micro-libraries for data visualization using React and D3
- Integrated custom WordPress admin frontend (PHP, Apache) for site contributors that hooked directly into our database to serve Editorial Content within our primary React architecture
- Mentored interns, onboarded contractors, implemented a code review process
- Served as gatekeeper of the company's Git repository (hosted on Bitbucket) and other key technical resources

Graphiq | Associate Product Manager

Santa Barbara, CA | January 2014 - July 2015

- Re-launched and grew specout.com, a flagship product, from 640k to 1.5m monthly sessions (130%) while improving engagement metrics (e.g. Time on Page, Bounce Rate) by 10%
 - Managed a persistent database of 25+ tables using ETL methods via Pentaho Data Integration and MySQL
 - Employed SEO strategies to achieve and maintain first page rankings on Google SERP
-

Open Source and Personal Projects:

react-universal-search | <https://github.com/jgliner/react-universal-search>

Highly customizable client-side 'auto-complete' component for large datasets

react-router-v4-redux-ssr | <https://github.com/jgliner/react-router-v4-redux-ssr>

A fully annotated walkthrough for Server-Side-Rendering with the newest version of react-router@v4 and react-router-redux@v5

OpenDoor | Software Engineer / Scrum Master

Q2 2016

- Devised and created a fully native iOS app using React Native alongside Redux
- Deployed to an AWS EC2 server using a Docker Container to house Postgres instance

LunchTrain | Software Engineer

Q1 2016

- Introduced secure login system using Slack's OAuth, sqlite3, and Slack's outgoing/incoming webhook APIs
 - Structured stateful React frontend and augmented with Google Maps and Places APIs
-

Education:

Hack Reactor | Advanced Software Engineering Immersive Program

2016

University of California, Santa Barbara | B.A.

2010 - 2014

Psychology, Applied Psychology, Technology Management

Personal Interests and Hobbies:

- Music Production, Guitar, Cooking, Running, Learning New Skills
- 2nd Degree Black Belt and Former Martial Arts Instructor
